

# Environmental Policy Statement

EPS Envirotech Ltd is fully committed to achieving the highest standards with regard to environmental matters arising out of our activities. We intend to be at the forefront of our industry through a policy of continual improvement. An integral element of our sensitivity to environmental issues is our awareness that it may affect not only our employees but also other stakeholders. We therefore give our environmental objectives equal consideration with all other organisational objectives when priorities for the allocation of resources are determined. Regular reviews of our environmental performance will be carried out to ensure that all managers, supervisors and employees meet their duties and responsibilities under this policy.

## Aims and Objectives of the Policy

EPS-Envirotech recognises that protection of the environment requires all activities to be conducted in a sustainable manner. We are fully committed to best environmental practice and each department takes responsibility for its own environmental performance. The organisation's top management has acknowledged these responsibilities by publishing this environmental policy and through its staff is committed to implementing the actions stated in the policy and objectives. To achieve this our organisation is:

1. Establishing environmental policies for which the top management has ultimate responsibility and that form part of the organisation's business plans;
2. Developing a comprehensive Environmental Management System (EMS) that ensures compliance with all relevant environmental legislation, regulations, codes of practice and any other standard to which the company subscribes. The organisation is also committed to the prevention of pollution. The EMS will evaluate the organisation's environmental impacts resulting in the setting of clear objectives to establish a regime of continual improvement in environmental performance. Our organisation's overall performance will be monitored by regular audits and annual reviews;
3. Integrating environmental management with health and safety management at all areas of activity.

Our EMS will develop over time so that all key issues pertinent to the organisation will be addressed. Initially our EMS will pay close attention to the following policy objectives:

1. Promoting ownership and control of environmental issues at business level by minimising the environmental impacts of our existing processes/activities and ensuring that the implications of new processes are fully assessed prior to their introduction;
2. Devising programmes to minimise waste and energy use through effective management and controlling our authorised processes and disposing of waste and effluents in a responsible and safe manner;
3. Reducing the potential for environmental accidents and incidents through risk assessments/action planning;
4. Providing the necessary training and support in order to ensure that the organisation can fulfil the requirements outlined in this policy.

Signed

  
 Wayne Bruce  
 Managing Director
